Nota di contenuto

Introduction -- Coronary artery intervention -- Primary PCI -- Calcified lesions -- LM lesions -- Bifurcation lesions -- Ostial lesions -- Chronic Total Occlusion lesions -- Post CABG lesions -- PCI in high risk patients -- Complex congenital structural heart intervention -- Transcatheter valvular intervention -- Complications -- Imaging.

Sommario/riassunto

This book presents a collection of cases in which advanced cardiology interventional procedures have been used to manage a range of clinical scenarios. Chapters detail how to perform each procedure in an easy-to-follow step-by-step format, and go on to describe potential pitfalls and how to incorporate relevant imaging techniques. For every technique described, key procedural points are provided to assist the reader in developing an understanding of how to manage these situations. Topics covered include coronary artery interventions for calcified lesions, chronic total occlusion lesions and transcatheter valvular interventions. *Mastering Skills in Complex Cardiovascular Interventions: A Case-Based Approach* is a practically applicable guide on how to utilize a range of advanced interventional cardiology techniques, making it an indispensable reference for all trainee and practicing interventional cardiology practitioners, cardiac surgeons and all cardiovascular professionals.

Potential of Microalgae Biomass for the Sustainable Production of Bio-commodities -- 10. Crassulacean Acid Metabolism

and Its Role in Plant Acclimatization to Abiotic Stresses and Defence Against Pathogens -- 11. The Role of the Shikimate and the Phenylpropanoid Pathways in Root-Knot Nematode Infection.-12. Functional Diversity of Photosynthesis, Plant-Species Diversity, and Habitat Diversity -- 13. When the Tree Let Us See the Forest: Systems Biology and Natural Variation Studies in Forest Species -- 14. The Ecological Importance of Winter in Temperate, Boreal, and Arctic Ecosystems in Times of Climate.

Sommario/riassunto

With one volume each year, this series keeps scientists and advanced students informed of the latest developments and results in all areas of the plant sciences. The present volume includes reviews on plant physiology, biochemistry, genetics and genomics, forests, and ecosystems.
