Sommario/riassunto

The book offers a comprehensive overview of the latest developments in facial plastic surgery by combining ENT and facial plastic surgery disciplines. The volume is divided into 8 parts and covers all aspects of the topic, from the structure of the face to facial anesthesia and acupuncture. It provides detailed explanations on how to achieve the best outcomes using rejuvenation techniques such as fillers, neurotoxins, suture lifts, and mesotherapy. These techniques will be discussed in detail to achieve cosmetic surgical excellence. This book is an invaluable tool for ENT practitioners, facial plastic surgeons, and plastic surgeons interested in staying up-to-date with the latest techniques and products in facial plastic surgery.
