

1. Record Nr.	UNINA9911035168203321
Autore	Simpson David
Titolo	Natural Gas Production : Engineering Essentials and Best Practices
Pubbl/distr/stampa	Tulsa, OK : , : PennWell Books, LLC, , 2024 ©2024
ISBN	1-955578-25-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (642 pages)
Altri autori (Persone)	NorthropScott
Disciplina	622/.3385
Soggetti	Natural gas Gas engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"This book starts with a discussion of the creation of natural gas and then follows the gas through storage in a reservoir, drilling, completions, downhole equipment, upstream surface facilities, plants, commodity transportation, and end use all from the point of view of surface engineers (i.e., while it discusses drilling it is not intended to teach someone how to drill a well, but it is intended to teach a facilities engineer how to design and operate surface facilities)"-- Provided by publisher.
