1. Record Nr. UNINA9911039311703321

Autore	Wang Jun
Titolo	Green Design and Carbon Neutrality / / by Jun Wang, Su Xu, Xuezhi Duan
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2025
ISBN	9789819525065 9789819525058
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (0 pages)
Collana	Sustainable Urban Design, , 3059-3573
Disciplina	307.76
Soggetti	Urban policy Urban economics Urban Policy Urban Economics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	-- Chapter 01 Green Design Overview. -- Chapter 02 Green Design Related Theories. -- Chapter 03 Green Design Standards. -- Chapter 04 Green Design Evaluation Method. -- Chapter 05 Evaluation Process and Examples. -- Chapter 06 Green Building Evaluation. -- Chapter 07 Green Cities Evaluation. -- Chapter 08 Global ‘Carbon Peak’ and ‘Carbon Neutrality’ Policies. -- Chapter 09 Examples of Carbon Neutral Companies and Carbon Neutral Products. -- Chapter 10 Examples of Carbon Neutral Buildings. -- Chapter 11 Carbon Neutrality Urban Examples. -- Chapter 12 Carbon Neutral Design Evaluation and Strategy.
Sommario/riassunto	This book focuses on the latest development of green design covering products, buildings and cities, including the related concepts, evaluation methods, and key technologies. It is divided into two parts, directly corresponding to the process from green design to carbon-neutral design. The first part comprehensively introduces contemporary green design from definitions, development, theoretical evolution, updated criteria, to evaluation methods. With a focus on green product design, green architecture design, and green city planning, it discusses evaluation methods and key technologies of green design. The second

part systematically demonstrates the transformation of design paradigms from the perspective of carbon neutrality, from global Carbon Peaking and Carbon Neutrality actions, carbon-neutral enterprises, carbon-neutral buildings, carbon-neutral cities, to evaluation methods and strategies for carbon-neutral design. The translation was done with the help of artificial intelligence. A subsequent human revision was done primarily in terms of content.
