| 1. Record Nr. | UNINA9911042411603321 |
| Autore | Trystram Gilles |
| Titolo | Modeling and Optimization of Food and Bio-Processes |
| Pubbl/distr/stampa | Newark : , : John Wiley & Sons, Incorporated, , 2026 ©2025 |
| ISBN | 1-394-42361-6 1-394-42359-4 |
| Edizione | [1st ed.] |
| Descrizione fisica | 1 online resource (292 pages) |
| Collana | ISTE Invoiced Series |
| Soggetti | TECHNOLOGY & ENGINEERING / Food Science / Food Packaging & Processing |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Sommario/riassunto | Models have become an indispensable tool for scientists and engineers alike. For the scientist, a model makes it possible to quantitatively test hypotheses, understand phenomena, and, if necessary, revise them until a satisfactory agreement with experiments is reached. |
