|-------------------------|---|
| 1. Record Nr. | UNIORUON00030137 |
| Autore | OZTUNA, Yilmaz |
| Titolo | Abdulkaadir Meragi / Yilmaz Oztuna |
| Pubbl/distr/stampa | Ankara, : Kültür Bakanligi, 1988 91 p. 2 c. di tav. ; 20 cm |
| ISBN | 97-517-0251-8 |
| Classificazione | OTT IX H |
| Soggetti | MUSICA TURCA |
| Lingua di pubblicazione | Turkish |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| 2. Record Nr. | UNINA9911044013703321 |
| Autore | Lorenc Wojciech |
| Titolo | Advances in Steel and Steel-Concrete Composite Structures : Bridging Science and Industry |
| Pubbl/distr/stampa | Milton : , : CRC Press LLC, , 2025 ©2026 |
| ISBN | 9781003534464 |
| Edizione | [1st ed.] |
| Descrizione fisica | 1 online resource (545 pages) |
| Altri autori (Persone) | CzepiakDariusz KozioPiotr GiejowskiMarian A MarcinowskiJakub HotaaEugeniusz |
| Disciplina | 624.182 |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di contenuto | Cover -- Title Page -- Copyright -- Table of Contents -- Preface -- |

Committees -- From material properties to complex structures --
Cable structures: Complex assessment based on the theory, codes and experience -- 1 Introduction -- 2 Modern Cable Structures: Case Study -- 3 Technical Assessment of the Structures -- 4 Conclusions --
Acknowledgments -- References -- Experimental verification of post-fire brittleness for S355J2+N structural steel -- 1 Introduction -- 2 Instrumented Charpy Impact Test as a Basis for Drawing Conclusions Regarding Post-Fire Brittleness of Considered Steel -- 3 The Tests of Post-Fire Susceptibility to Brittle Fracture Exhibited by the S355J2+N Steel Grade, Conducted at Cracow University of Technology -- 4 Interpretation of the Obtained Results -- 5 Concluding Remarks --
References -- The role of weathering steel in modern bridge design -- 1 Introduction -- 2 Design and Detailing -- 3 Application of WS in Bridge Structures -- 4 Conclusions -- References -- Proposed cold deformation limitation for steel I-beams made of S460M -- 1 Introduction -- 2 Preparation of Test Items -- 3 Materials Research -- 4 Analysis of the Results -- 5 Summary and Conclusions -- References -- Determination of the strength of historical structural steels based on Brinell hardness -- 1 Introduction -- 2 The Relationship Between the Brinell Hardness and Strength of Historical Steels -- 3 Estimation of Steel Strength Parameters Based on Brinell Hardness -- 4 Selected Examples of Determining the Design Strength of Historical Steels in Building Structures -- 5 General Remarks and Conclusions --
References -- Vierendeel frame as steel roof girder for large-span halls -- 1 Introduction -- 2 Vierendeel Frame -- 3 Design and Comparative Analysis of Frame Nodes -- 4 Example of Vierendeel Frame Applications -- 5 Conclusions -- References.
Stability and buckling in steel structures -- Buckling behaviour of longitudinal stiffened plates under biaxial loading: Investigations of the last years -- 1 Introduction -- 2 Incremental Launching of Steel and Composite Bridges -- 3 Current Design Rules in Europe and Germany - EN 1993-1-5 -- 4 Measuring imperfections at Thulba Viaduct -- 5 Experimental Investigations -- 6 Investigations on the V-factor experimentally and numerically -- 7 Numerical Investigation -- 8 Comparison of the Numerical Results with the Reduced Stress Method -- 9 Consideration of an Eccentric Load Introduction in the Buckling Verification -- 10 Discussion of the Results -- 11 Conclusion --
Acknowledgments -- References -- Webs with two longitudinal stiffeners: Real imperfections and selected modeling problems -- 1 Real Geometric Imperfections of Longitudinal Stiffened Panels -- 2 Numerical Calculations of Webs With Real Imperfections -- 3 Conclusions -- References -- Influence of imperfections on failure temperature of non-uniformly heated steel plate girders with slender section -- 1 Introduction -- 2 Experimental Study -- 3 Computer Modeling -- 4 The Results and Their Discussion -- 5 Conclusions -- References -- Influence of vertical stiffening ribs on the stability of tapered I-beams -- 1 Introduction -- 2 Potential Energy of the Tapered Cross-Section Beam -- 3 Solution for Critical Buckling Loads of Tapered I-Beams With Stiffener Ribs -- 4 Application -- 5 Summary and Conclusions -- References -- Experimental verification of lateral-torsional buckling of steel H-beams with tapered flanges -- 1 Introduction -- 2 Model of Bisymmetric Flange-Tapered H-Beam -- 3 Experimental Test on Flange-Tapered H-Beam Under Point Load -- 4 Conclusions -- References -- Flexural-torsional buckling of steel monosymmetric I-shape section members -- 1 Introduction.
2 Non-Classical Stability Criteria and Analytical Solutions -- 3 Applications -- References -- Analysis of the torsional stiffness of tapered, two-chords steel columns with lacing in a single plane -- 1

Introduction -- 2 Differential Equations of Warping Torion of Tapered Elements -- 3 The Differential Equation's of the Warping Torsion of the Built-Up Member Under Consideration -- 4 Numerical Examples -- 5 Numerical Calculations -- 6 Summary and Conclusion -- References -- Composite steel-concrete structures -- Considerations about slip capacity of composite dowels according to the CEN TS 102: Annex A for floor beam application -- 1 Introduction and Scope of the Study -- 2 Theoretical Background -- 3 Numerical Study with FEM Simulations -- 4 Proposed Prediction Equations -- 5 Conclusions -- References -- Composite steel, concrete beams and slabs using fiber reinforced concrete: An example of a completed large structure and delivered benefits -- 1 Background and Design Conditions -- 2 Composite Design for Industrial Floors -- 3 Fiber Concrete Instead of Traditional Reinforced Concrete -- 4 Summary -- Acknowledgments -- References -- The Crocodile steel and concrete hybrid bridge: Experiences from design and construction -- 1 Crocodile Solution -- 2 The Bridge Over Kwisa River in Trzebów -- 3 The Design Issues -- 4 The Bridge Construction -- 5 Conclusions -- References -- Evaluation of wind loads on a steel hall frame during erection using CFD analysis -- 1 Introduction -- 2 Analysis of Steel Building Structure While in Service -- 3 Analysis of Steel Building Structure Collapse -- 4 Identification of Wind Loading at the Instant of Collapse By CFD -- 5 Conclusions -- Analysis of Structural Stability During Collapse -- 6 Conclusions -- References -- Fire resistance of composite steel truss in concrete (CSTC) beams: Bending moment and vertical shear.

1 Introduction and Motivation -- 2 Bending Behaviour -- 3 Vertical Shear Resistance -- 4 Summary and Outlook -- References -- Cyclic behavior of composite beams with puzzle-shaped shear connectors under asymmetric bending -- 1 Introduction -- 2 Outline of Experiment -- 3 Results of Cyclic Loading Tests -- 4 Conclusions -- Acknowledgments -- References -- Local buckling behavior of composite beams with puzzle-shaped shear connectors under asymmetric bending -- 1 Introduction -- 2 Outline of Experiment -- 3 Results of Cyclic Loading Test -- 4 Conclusion -- Acknowledgments -- References -- From heritage analysis to modern composite applications -- Steel shell structures for applications in storage of granular materials: Advances in design methods -- 1 Introduction -- 2 Normative Estimation of Buckling Load Capacity -- 3 Numerical and Experimental Methods for Assessing the Buckling Capacity of Silos -- 4 Influence of Bulk Material on the Buckling Capacity of a Silo Wall Made of Profiled Sheets and Columns (Stiffeners) -- 5 Conclusions -- References -- Vibrations of metal-timber composite beams: A review -- 1 Introduction -- 2 Dynamic Tests of Metal-Timber Composite Beams -- 3 Conclusions -- References -- Optimization of a steel-timber composite beam using AI -- 1 Introduction -- 2 Materials and Methods -- 3 Results and Discussion -- 4 Conclusions -- References -- Investigations of metal-timber composite beams and connections: A review -- 1 Introduction -- 2 Aluminium-Timber Composite Beams and Connections -- 3 Steel-Timber Composite Beams and Connections -- 4 Conclusions -- References -- Vibration of steel-concrete composite beams: A review -- 1 Introduction -- 2 Steel-Concrete Composite Beams -- 3 Experimental Studies -- 4 Numerical Models -- 5 Conclusions -- References.

Analysis of the relationship between the strength and Brinell hardness of historical steels -- 1 Introduction -- 2 Samples and the Research Program -- 3 Non-Destructive Testing of Steel Hardness -- 4 Destructive Tensile Tests of the Steel Samples -- 5 Chemical and Microstructure Testing -- 6 Statistical Analysis of the Research Results

-- 7 General Remarks and Conclusions -- References -- Methodology for determining the steel tensile strength of historic steel structures -- 1 General Informations -- 2 Description and Results of the Conducted Research -- 3 Conclusions -- References -- Innovation and monitoring in steel engineering -- Analytical review of the behaviour of joints and anchors in scaffolding systems under static and dynamic loads -- 1 Introduction -- 2 Literature Review -- 3 Comparing the Energy Absorption, Initial Stiffness, Ductility, and Load-Bearing Capacity in the Joints and Anchors of the Scaffoldings -- 4 Conclusion -- References -- Assessment of the distribution of external pressure coefficients on a flat roof with a photovoltaic panels -- 1 Introduction -- 2 Materials and Methods -- 3 Results -- 4 Discussion -- 5 Conclusions -- References -- Damping determination in instrumented steel buildings -- 1 Introduction -- 2 Proposed Method for Damping Coefficient Estimation -- 3 Validation Against Shake Table Measurements -- 4 Results and Discussion -- References -- New diagnostic solutions for steel structures: Laboratory and industrial applications -- 1 Introduction -- 2 Plastic Deformation Sensor (PDS) -- 3 FBG-Based Epsilonpeak -- 4 Distributed Fibre Optic Sensors (DFOS) -- 5 Summary -- Funding -- References -- Deformation mitigation and displacement control in steel scissor structures -- 1 Introduction -- 2 Adding Extra Cables -- 3 Nodal Displacement Control of Steel Scissor Structures -- 4 Conclusions -- References.

Connections in steel structures.

Sommario/riassunto

Advances in Steel and Steel-Concrete Composite Structures: Bridging Science and Industry presents the proceedings of the 15th International Conference on Metal Structures (ICMS 2025), held on May 28-30, 2025 in Wroclaw, Poland.
