1. Record Nr. UNINA9911046544703321

Autore	Barolli Leonard
Titolo	Advances in Networked-Based Information Systems : The 28th International Conference on Network-Based Information Systems (NBiS-2025), Volume 2 / / edited by Leonard Barolli, Hsing-Chung Chen, Tomoya Enokido
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2026
ISBN	3-032-05892-9
Edizione	[1st ed. 2026.]
Descrizione fisica	1 online resource (365 pages)
Collana	Lecture Notes on Data Engineering and Communications Technologies, , 2367-4520 ; ; 269
Altri autori (Persone)	ChenHsing-Chung EnokidoTomoya
Disciplina	006.3
Soggetti	Computational intelligence Artificial intelligence Computational Intelligence Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Development of a Multimodal Dialogue System Integrating Speech Recognition, Knowledge Reasoning, and TTS via Multimodal Large Language Models -- Implementation of Cat Swarm Optimization Simulation System for Node Placement Problem in Wireless Mesh Networks -- Slow HTTP POST DDoS Attack Prevention Method that Monitors Payload Size and Number of Connections.
Sommario/riassunto	The networks and information systems of today are evolving rapidly. There are new trends and applications in information networking such as wireless sensor networks, ad hoc networks, peer-to-peer systems, vehicular networks, opportunistic networks, cloud computing, ubiquitous computing, multimedia systems, security, multi-agent systems, high-speed networks, and web-based systems. These kinds of networks need to manage the increasing number of users, provide support for different services, guarantee QoS, and optimize the network resources. For these networks, there are many research issues and challenges that should be considered and find solutions. The aim

of the volume “Advances in Network-Based Information Systems” is to provide latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and their applications.
