Sommario/riassunto	Networking technology and applications are going through a rapid evolution. Different kinds of networks with different characteristics are emerging and they are integrating into heterogeneous networks. For these reasons, there are many interconnection problems which may occur at different levels of the hardware and software design of communicating entities and communication networks. These kinds of networks need to manage an increasing usage demand, provide support for a significant number of services, guarantee their QoS, and optimize the network resources. The success of all-IP networking and wireless technology has changed the ways of living the people around the world. The progress of electronic integration and wireless

communications is going to pave the way to offer people access to wireless networks on the fly, based on which all electronic devices will be able to exchange information with each other in ubiquitous way whenever necessary. The aim of the volume "Advances on Broadband and Wireless Computing, Communication and Applications" is to provide latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of broadband and wireless computing.

Sommario/riassunto

In this book John Radner examines the fluctuating, close, and complex friendship enjoyed by Samuel Johnson and James Boswell, from the day they met in 1763 to the day when Boswell published his monumental *Life of Johnson*. Drawing on everything Johnson and Boswell wrote to and about the other, this book charts the psychological currents that flowed between them as they scripted and directed their time together, questioned and advised, confided and held back. It explores the key longings and shifting tensions that distinguished this from each man's other long-term friendships, while it tracks in detail how Johnson and Boswell brought each other to life, challenged and confirmed each other, and used their deepening friendship to define and assess themselves. It tells a story that reaches through its specificity into the dynamics of most sustained friendships, with their breaks and reconnections, their silences and fresh intimacies, their continuities and transformations.
