| Sommario/riassunto | The Spanish Journal of Legal Medicine (Revista Espanola de Medicina Legal), first published in 1974, is the official Journal of the National Association of Forensic Physicians (la Asociacion Nacional de Medicos Forenses). The Journal publishes scientific articles of different topics in the field of legal and forensic medicine which are represented as a |

learning tool of the specialty that gives the reader an update of different topics in the field of legal and forensic medicine. It also serves as continuing education in practical aspects of the daily work of the forensic physician in the field of the Administration of Justice. The journal incorporates all groups--forensic physicians, specialists in legal and forensic medicine, university teachers, psychiatrists and psychologists, experts in the assessment of body injury, scientific police and legal experts interested in the subject.
