

1. Record Nr.	UNINA9911049070303321
Autore	Sarma Sasi
Titolo	Advances in bioprotection of plants against diseases / / edited by Shashi Sharma, Minshad Ansari
Pubbl/distr/stampa	Cambridge, UK : , : Burleigh Dodds Science Publishing Limited : , : Imprint : Burleigh Dodds Science Publishing, , 2025
ISBN	1-80146-730-7 1-80146-729-3
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (409 pages)
Collana	Burleigh Dodds Series in Agricultural Science, , 2059-6944 ; ; 158
Disciplina	632.3
Soggetti	Agriculture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The bioprotectants market was estimated to be worth \$5.5 billion in 2022, with this figure set to rise to over \$11 billion by 2027. With more than 1000 products on the market, a greater understanding of how individual species/strains function as bioprotection agents is required. Advances in bioprotection of plants against diseases considers recent advances in techniques used to identify and develop fungal and bacterial bioprotection agents, including <i>Clonostachys rosea</i>, <i>Phytophthora oligandrum</i> and <i>Actinomycetes</i>. The book also includes a variety of case studies which detail the successful implementation of bioprotection agents to control diseases in a variety of crops, including grapes, cereals and potatoes. This book builds on and adds to the successful recent title published by Burleigh Dodds Science: <i>Microbial bioprotectants for plant disease management</i> (2021).</p>
