Livello bibliografico	Monografia
Nota di contenuto	Dedication -- Forward -- Acknowledgement -- History of Cosmetics Through the Ages A short presentation on the history of cosmetics from early times to the present day -- Physiology of the Skin Hair and Nails An overview as to the problem faced while trying to formulate products intend for each area of the body -- Skin Moisturizers Exfollients and AntiAging Agents An explanation as to the need for each of these agents and appropriate ingredients to be used -- Hair Products Shampoos Conditioners Straighteners Colorants Curling and Waiving Agents and Hair Extensions -- Eye Products Eye Shadow Eye Liner Mascara -- Nail Products Nail Polish Polish Remover Cuticle Softener an Removal Nail Extensions -- Personal Care Products Tooth Paste Mouthwash Deodorants Antiperspirants Feminine Hygiene Shaving Products Foot Products Bath Products -- Baby Products Bath Products Diaper Rash Products Moisturizers Skin Protectants Products for Men Shampoos Deodorants and Antiperspirants Shaving Products Bath Products Grooming Aids Fragrance Skin Nail and Hair Colorant -- Perfumes Colognes Toilet Waters and Other Aromatic Products The use of these products through the ages by both men and women Formulation Considerations Formulation of all or most of the products presented in the previous chapters briefly presented -- Newer Technologies Emerging in the Cosmetic Industry as well as Future

Sommario/riassunto

This is the only textbook designed to provide current information in the area of cosmetic science, the various product's formulation and new and future technologies associated with the discovery, development and formulation of cosmetic products. The main topics are a short history of cosmetics; a review of the physiology of skin, hair and nails; and a current discussion of cosmetic products and their usage for the skin, hair, nails, eye, personal care products for women; baby products; products utilized by and for men; perfumes, colognes, toilet waters and other aromatic products; formulation considerations for the various product forms; and newer technologies and future products for the market place. All of these topics are designed to expand upon the basic knowledge of the reader, whether they be an undergraduate, graduate, PhD, a young researcher or an established professional. The primary market for this text is college students who have an educational background in pharmaceuticals, chemistry, biology, chemical engineering or related field, and wish to obtain employment in the cosmetic industry. It is equally essential information for industry professionals and academics. .
