

1. Record Nr.	UNINA9911049202803321
Autore	Bhateja Vikrant
Titolo	Smart Computing Paradigms: Human-Centric Systems for Sustainable Development : Proceedings of Seventh International Conference on Smart Computing and Informatics (SCI 2025), Volume 4 // edited by Vikrant Bhateja, Angela Lee Siew Hoong, Yeoh Ging Sun William, Zaid Omar
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2026
ISBN	3-032-08253-6
Edizione	[1st ed. 2026.]
Descrizione fisica	1 online resource (766 pages)
Collana	Lecture Notes in Networks and Systems, , 2367-3389 ; ; 1685
Altri autori (Persone)	Bhateja
Disciplina	006.3
Soggetti	Computational intelligence Artificial intelligence Telecommunication Computational Intelligence Artificial Intelligence Communications Engineering, Networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Traffic Board Detection Using Object Detection Algorithm -- Deep Learning Models for Predictive Maintenance in Aviation with Explainable AI using SHAP -- Assessment of E-Learning Effectiveness Using WP Method in a Decision Support System Framework -- Green IT and Sustainable Information Systems: Innovations, Challenges, and the Path to a Sustainable Digital Future -- Comprehensive Framework for Malware Detection Using Federated Learning with TLSH-Based Clustering -- Tomatoes Disease Detection Using Machine Learning Algorithms -- AI System For Detecting Lung Diseases & Patient Management: Acoustic Diagnostics -- A Personalized Voice Assistant Approach Leveraging Generative AI -- Enhancing Deepfake Detection Generalization: A Scalable and Real-Time Detection -- Comprehensive Analysis and Enhanced Management Strategies for Cloud Data Breaches in Modern Enterprises.
Sommario/riassunto	This book presents best-selected papers presented at the 7th

International Conference on Smart Computing and Informatics (SCI 2025), held at the School of Engineering and Technology (SET), Sunway University, Selangor, Malaysia, during 8 – 9 April 2025. It presents advanced and multidisciplinary research towards the design of smart computing and informatics. The theme is on a broader front and focuses on various innovation paradigms in system knowledge, intelligence and sustainability that may be applied to provide realistic solutions to varied problems in society, environment and industries. The scope is also extended towards the deployment of emerging computational and knowledge transfer approaches, optimizing solutions in various disciplines of science, technology and healthcare. The work is published in four volumes.
