

1. Record Nr.	UNINA9911049209303321
Autore	Nardone Massimo
Titolo	Securing Smart Things : A Hands-On Guide to Safeguarding Smart Systems / / by Massimo Nardone
Pubbl/distr/stampa	Berkeley, CA : , : Apress : , : Imprint : Apress, , 2026
ISBN	979-88-6882-367-1
Edizione	[1st ed. 2026.]
Descrizione fisica	1 online resource (88 pages)
Collana	Apress Pocket Guides, , 3004-9288
Disciplina	005.8
Soggetti	Internet of things Computer networks - Security measures Internet of Things Mobile and Network Security
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Chapter1: Foundations of IoT and the Security Landscape Description -- Chapter 2: Vulnerabilities in IoT Systems -- Chapter 3: Threats and Cybersecurity Attack Vectors for IoT -- Chapter 4: Securing the Future of IoT.
Sommario/riassunto	As the Internet of Things (IoT) continues to reshape industries—from smart homes and healthcare to manufacturing and mobility—the need for robust, real-world security solutions has never been more urgent. This book is a hands-on guide to understanding and implementing practical IoT security strategies. This accessible introduction goes beyond theory to focus on what matters most: protecting connected devices, securing networks, and ensuring data integrity across complex ecosystems. The book shows how to identify vulnerabilities, mitigate risks, and apply proven techniques to safeguard everything from consumer gadgets to industrial systems. Whether you're deploying smart sensors in a factory or managing a fleet of connected medical devices, this book equips you with the tools and knowledge to build secure, resilient IoT systems—today and into the future. You Will Learn To: Harden IoT devices against common attack vectors Secure communication channels and network infrastructure Protect the IoT supply chain from end to end Strengthen data privacy and meet

compliance requirements.
