

1. Record Nr.	UNINA9911054604103321
Autore	Bhateja Vikrant
Titolo	Smart Computing Paradigms: Intelligence and Network Applications : Proceedings of Seventh International Conference on Smart Computing and Informatics (SCI 2025), Volume 1 // edited by Vikrant Bhateja, Angela Lee Siew Hoong, Jude Dzevela Kong, Shabana Urooj
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2026
ISBN	3-032-08240-4
Edizione	[1st ed. 2026.]
Descrizione fisica	1 online resource (797 pages)
Collana	Lecture Notes in Networks and Systems, , 2367-3389 ; ; 1682
Altri autori (Persone)	Bhateja
Disciplina	006.3
Soggetti	Computational intelligence Artificial intelligence Telecommunication Computational Intelligence Artificial Intelligence Communications Engineering, Networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Building Legal Intelligence: Designing & Developing a Chatbot with LLM -- Unlocking Banking Insights: Big Data-Powered Artificial Neural Networks -- Deep Fake Detection Using Deep Learning -- Smart Surveillance: Real-Time Crowd Detection and Density Estimation with CNNs -- Enhanced Used Car Price Prediction Using Ensemble Machine Learning Techniques -- A Hybrid Approach using BERT and Machine Learning Model for Startup Valuation -- Detection of Neurodegenerative Disorders -- Enhanced Steganography: A Deep Learning Approach Using SENets and Self-Attention -- Hybrid Deep Learning Models for Enhanced Password Security Assessment -- A Decision Support System Using the SAW Method for Evaluating Teacher Performance in Vocational School.
Sommario/riassunto	This book presents best-selected papers presented at the 7th International Conference on Smart Computing and Informatics (SCI 2025), held at the School of Engineering and Technology (SET), Sunway University, Selangor, Malaysia, during 8 – 9 April 2025. It presents

advanced and multidisciplinary research towards the design of smart computing and informatics. The theme is on a broader front and focuses on various innovation paradigms in system knowledge, intelligence and sustainability that may be applied to provide realistic solutions to varied problems in society, environment and industries. The scope is also extended towards the deployment of emerging computational and knowledge transfer approaches, optimizing solutions in various disciplines of science, technology and healthcare. The work is published in four volumes.
