

1. Record Nr.	UNINA9911055724903321
Titolo	BSAVA manual of canine and feline thoracic imaging / editors: Tobias Schwarz and Peter Scrivani
Pubbl/distr/stampa	Quedgeley, : British small animal veterinary association, 2024
ISBN	9781910443934
Edizione	[2. ed]
Descrizione fisica	VI, 465 p. ; 30 cm
Collana	BSAVA manuals series
Disciplina	636.08960757
Locazione	FMVBC
Collocazione	636.08960757
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Thoracic radiographs are relatively easy to obtain, but particularly difficult to interpret. The BSAVA Manual of Canine and Feline Thoracic Imaging aims to help practitioners, students and radiologists alike meet this challenge. The very popular Manual has been comprehensively updated for its second edition. The manual begins with introductory chapters, which provide the reader with a grounding in the various imaging modalities. There are two new chapters: a discussion of the potential applications of artificial intelligence technology in thoracic imaging and a detailed section dedicated to the principles of thoracic imaging interpretation. The second section is devoted to the individual body systems. To aid the reader with information retrieval, each anatomical region is approached in the following way: radiographic anatomy and variations; interpretive principles; and diseases. Information on diseases is further subdivided into sections covering radiographic findings and the results and interpretation of other imaging studies. Each of the chapters is accompanied by a wealth of images, demonstrating both the normal radiographic appearance of structures and the abnormalities associated with disease. Specially commissioned illustrations provide an extra dimension.</p>
