1.	Record Nr.	UNINA9911057014503321
	Autore	Bhateja Vikrant
	Titolo	Smart Computing Paradigms: Intelligent Solutions for Sustainable Wellbeing : Proceedings of Seventh International Conference on Smart Computing and Informatics (SCI 2025), Volume 3 / / edited by Vikrant Bhateja, Angela Lee Siew Hoong, Yeoh Ging Sun William, Muhammad Ehsan Rana
	Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2026
	ISBN	3-032-08246-3
	Edizione	[1st ed. 2026.]
	Descrizione fisica	1 online resource (831 pages)
	Collana	Lecture Notes in Networks and Systems, , 2367-3389 ; ; 1684
	Altri autori (Persone)	Bhateja
	Disciplina	006.3
	Soggetti	Computational intelligence Artificial intelligence Telecommunication Computational Intelligence Artificial Intelligence Communications Engineering, Networks
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	Evaluation of ACL Tears in Knee with MRI Scanning system using Transformer and Deep Learning -- Bayesian and Box Behnken Design for XGboost Hyperparameters on Energy Consumption Profile Model Optimisation -- Automated Greenhouses: IoT-Driven Climate Control -- Speech Emotion Recognition Using a CNN-Transformer Approach on Diverse Datasets -- Ensemble Learning for Automated Recognition of Candlestick Patterns in Financial Markets -- Integrating AI and NLP for Adaptive Mental Health Chatbots: A Hybrid Approach -- AI Systems Real-Time Focused Screening of Diabetic Retinopathy Using Deep Learning -- Optimizing Pothole Detection Using YOLO Variants: v5, v7, and v8 Performance Benchmark -- Advancements in Astronaut Health Monitoring Technologies -- Melanoma Tumor Size Prediction: A Comparative Study on the Effectiveness of Different Machine Learning Models.
	Sommario/riassunto	This book presents best-selected papers presented at the 7th

International Conference on Smart Computing and Informatics (SCI 2025), held at the School of Engineering and Technology (SET), Sunway University, Selangor, Malaysia, during 8 – 9 April 2025. It presents advanced and multidisciplinary research towards the design of smart computing and informatics. The theme is on a broader front and focuses on various innovation paradigms in system knowledge, intelligence and sustainability that may be applied to provide realistic solutions to varied problems in society, environment and industries. The scope is also extended towards the deployment of emerging computational and knowledge transfer approaches, optimizing solutions in various disciplines of science, technology and healthcare. The work is published in four volumes.
