

1. Record Nr.	UNINA9911064748903321
Autore	Kovacevic Ahmed
Titolo	14th International Conference on Compressors and Their Systems : Conference Proceedings: Volume I // edited by Ahmed Kovacevic, Matthew Read, Sham Rane, Ivona Ivkovic-Kihic, Halil Lacevic
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2026
ISBN	3-032-04102-3
Edizione	[1st ed. 2026.]
Descrizione fisica	1 online resource (731 pages)
Collana	Springer Proceedings in Energy, , 2352-2542
Altri autori (Persone)	Kovacevic
Disciplina	621.8
Soggetti	Machinery Thermodynamics Heat engineering Heat transfer Mass transfer Renewable energy sources Buildings - Environmental engineering Mechanics, Applied Machinery and Machine Elements Engineering Thermodynamics, Heat and Mass Transfer Renewable Energy Building Physics, HVAC Engineering Mechanics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Screw Compressors -- Chapter 2. Scroll Compressors -- Chapter 3. Reciprocating Compressors -- Chapter 4. Vane Compressors -- Chapter 5. Measurement and Instrumentation/System control -- Chapter 6. Modelling and Simulation -- Chapter 7. Compressor systems and optimisation -- Chapter 8. Novel Compressors -- Chapter 9. Other machines and expanders -- Chapter 10. Turbomachinery.
Sommario/riassunto	This proceedings book discusses developments in air, gas and refrigeration compressors, vacuum pumps, and expanders. It is the 14h

edition of the International Conference on Compressors and their Systems, a three-day conference organized by the Centre for Compressors Technology at City St George's, University of London supported by, among others, IMechE, IIR, and IOR. The International Conference on Compressors and their Systems series began in 1999 as a result of industrial consultation and need for academic collaboration. At the time, the conference was organized by the Fluid Machinery Group of the Institution of Mechanical Engineers (IMechE) with support from Holroyd. From 2009, the Centre for Compressor Technology at City, University of London, took over its management and the conference is now one of the main conventions, taking place biennially in the UK, becoming world-renowned for its place in industry and academia to gather and discuss a broad range of topical issues related to compressors and compression systems. The theme of this conference is "Emerging Technologies in Compressors and their Systems".
