

1. Record Nr.	UNINA9911066118703321
Autore	Maréchal Jean-Didier
Titolo	Computational Bioinorganics : From Description to Prediction
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2026 ©2026
ISBN	1-119-41509-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (256 pages)
Disciplina	572.51
Soggetti	Bioinorganic chemistry Computational chemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	An in-depth overview of what computation can do in bioinorganic chemistry, written for experimentalists and theoreticians The last decades have shown the emergence of numerous exiting fields in bioinorganic chemistry, such as the design of de novo metalloenzymes, the discovery of new bioactive metallodrugs, or the characterization of molecular.
