| 2. Record Nr. | UNINA9911100451503321 |
| Titolo | AIX reference for Sun Solaris administrators / / Arkadiusz Rybakowski ... [et al.] |
| Pubbl/distr/stampa | Austin, Tex., : IBM Corp., 2002 |
| Edizione | [1st ed.] |
| Descrizione fisica | xx, 532 p. : ill |
| Collana | IBM redbooks |
| Altri autori (Persone) | RybakowskiArkadiusz |
| Disciplina | 005.4/46 |
| Soggetti | Operating systems (Computers) |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Bibliographic Level Mode of Issuance: Monograph |
| Nota di bibliografia | Includes bibliographical references (p. 513-515) and index. |
| Nota di contenuto | Front cover -- Contents -- Figures -- Tables -- Notices -- Trademarks -- Preface -- The team that wrote this redbook -- Comments welcome -- Chapter 1. Overview -- 1.1 Solaris and AIX: A quick feature summary -- 1.1.1 Overview of features for Solaris 7 and Solaris 8 -- 1.1.2 Overview of features of AIX Version 4.3 and AIX 5L Version 5.1 -- 1.2 Systems administration overview -- 1.2.1 System Management Interface Tool (SMIT) -- 1.2.2 Web-based System Manager -- 1.3 Introduction to pSeries (and RS/6000) architectures -- 1.3.1 POWER2 |

Super Chip -- 1.3.2 POWER3 -- 1.3.3 POWER3 II chip -- 1.3.4 PowerPC -- 1.3.5 RS64 processor family -- 1.3.6 POWER4 -- Chapter 2. Software packaging -- 2.1 Overview -- 2.2 Software packaging in Solaris 8 -- 2.3 Software packaging in AIX 5L -- Chapter 3. Installing and upgrading tasks -- 3.1 Hardware requirements -- 3.1.1 Supported platforms for Solaris 8 -- 3.1.2 Supported platforms for AIX 5L Version 5.1 -- 3.2 Software terminology in AIX 5L -- 3.3 Installation methods -- 3.4 AIX installation process from product CD-ROM -- 3.5 Option 1 of the Installation and Maintenance menu -- 3.5.1 Installation disks -- 3.6 Option 2 of the Installation and Maintenance menu -- 3.7 Option 3 of the Installation and Maintenance menu -- 3.8 Begin installation -- 3.9 Installation flow chart -- 3.10 Configuration Assistant menu -- 3.11 Verifying correct installation -- 3.12 Maintenance updates and patching -- 3.12.1 Obtaining maintenance levels -- 3.12.2 Installing maintenance levels and fixes -- 3.12.3 Removing a fix -- 3.13 Installing and removing additional software -- 3.13.1 Installing software under Solaris 8 -- 3.13.2 Removing software under Solaris 8 -- 3.13.3 Software states under AIX 5L -- 3.13.4 Installing software under AIX 5L -- 3.13.5 Listing installed software -- 3.13.6 Software maintenance -- 3.14 Install OS on another disk. 3.14.1 Benefits of alternate disk installation -- 3.14.2 System requirements -- 3.14.3 Alternate disk rootvg cloning -- 3.14.4 Alternate mkysyb install -- 3.15 JumpStart -- 3.15.1 Installing the boot server -- 3.15.2 Install server on same subnet as client -- 3.15.3 Install server on different subnet than client -- 3.15.4 Boot install clients -- 3.16 Network Installation Management (NIM) -- 3.16.1 NIM environments -- 3.16.2 NIM setup -- 3.16.3 Booting a machine over the network -- 3.17 Quick reference -- Chapter 4. System startup and shutdown -- 4.1 The system startup process -- 4.1.1 Useful commands -- 4.2 The /etc/inittab file -- 4.3 System shutdown -- 4.4 Manage the system environment -- 4.5 Quick reference -- Chapter 5. Device management -- 5.1 Overview -- 5.2 Device management in Solaris 8 -- 5.2.1 Listing device configuration -- 5.2.2 Managing device drivers -- 5.2.3 Configuring a device -- 5.2.4 Adding a new device to a SCSI bus -- 5.2.5 Remove a SCSI device -- 5.3 Device management in AIX 5L Version 5.1 -- 5.3.1 Listing devices -- 5.3.2 Adding devices -- 5.3.3 Removing a device -- 5.3.4 Changing a device -- 5.4 Quick reference -- Chapter 6. Logical Volume Manager and disk management -- 6.1 Logical volume management overview -- 6.2 Introducing the logical volume solutions -- 6.2.1 Solaris Solstice DiskSuite: Introduction -- 6.2.2 VERITAS Volume Manager: Introduction -- 6.2.3 AIX 5L Version 5.1 LVM: Introduction -- 6.3 Working with logical volume manager -- 6.3.1 Volume groups -- 6.3.2 Working with logical volumes -- 6.3.3 Working with physical disks -- 6.3.4 Additional features: Hotspare disks -- 6.4 Quick reference -- Chapter 7. File system management -- 7.1 Overview -- 7.1.1 Solaris file systems types and commands -- 7.1.2 AIX file systems types and commands -- 7.2 Formatting and partitioning a disk (Solaris only). 7.3 Creating a file system -- 7.4 Mounting and unmounting a file system -- 7.5 Checking file system consistency -- 7.6 Changing file system attributes -- 7.7 Removing a file system -- 7.8 Displaying a file system information -- 7.8.1 Displaying defined file systems -- 7.8.2 Displaying the file systems mount table -- 7.8.3 Displaying the available file system space -- 7.9 Back up and restore file systems -- 7.10 File system logging -- 7.11 Compression and defragmentation (AIX only) -- 7.11.1 Compressed journaled file system -- 7.11.2 Defragmentation -- 7.12 Paging space management -- 7.12.1 Monitoring paging space resources -- 7.12.2 Adding and activating a

paging space -- 7.12.3 Changing attributes of a paging space (AIX only) -- 7.12.4 Removing a paging space -- 7.13 Quick reference -- Chapter 8. Backup and restore -- 8.1 Overview -- 8.2 Backing up files and file systems -- 8.2.1 The ufsdump and backup commands -- 8.2.2 Backing up files and directories -- 8.2.3 Backing up file systems -- 8.3 Restoring files and file systems -- 8.4 Backing up volume groups -- 8.5 Creating a bootable system image -- 8.5.1 Creating system image backups on CD-ROM -- 8.5.2 Restoring the system image -- 8.6 Other UNIX backup commands -- 8.6.1 tar command -- 8.6.2 cpio command -- 8.6.3 dd command -- 8.7 Quick reference -- Chapter 9. Network management -- 9.1 Overview -- 9.1.1 TCP/IP V6 -- 9.2 Configuring network interface -- 9.2.1 The ifconfig command -- 9.3 Configuring TCP/IP -- 9.4 TCP/IP daemons -- 9.4.1 Stopping and restarting TCP/IP daemons -- 9.5 Network File System (NFS) -- 9.5.1 Configuring NFS in Solaris -- 9.5.2 Configuring NFS in AIX 5L -- 9.6 DNS -- 9.6.1 Configuration of DNS -- 9.6.2 Configuring master server -- 9.6.3 Configuring the slave name server -- 9.6.4 Configuring DNS clients -- 9.6.5 nslookup command -- 9.6.6 Name resolution order. -- 9.7 Network Information Service (NIS) -- 9.7.1 Configuring NIS -- 9.7.2 Configuring NIS master server -- 9.7.3 Configuring NIS client -- 9.8 Quick reference -- Chapter 10. User management -- 10.1 Overview -- 10.2 Adding users -- 10.3 Removing users -- 10.4 Displaying currently logged users -- 10.5 Changing users, passwords, and other attributes -- 10.5.1 Changing a user's password -- 10.5.2 Disabling a user account -- 10.5.3 Modifying a user account -- 10.6 Customizing a user's work environment -- 10.6.1 /etc/security/environ -- 10.6.2 /etc/environment -- 10.6.3 /etc/profile and HOME/.profile -- 10.7 Password files -- 10.8 Administering groups -- 10.8.1 Adding a group -- 10.8.2 Modifying an existing group -- 10.8.3 Deleting a group -- 10.9 Checking passwords and group definitions consistency -- 10.10 Defining system resources limits for users -- 10.11 Quick reference -- Chapter 11. Process management -- 11.1 Overview of process management related commands and tools -- 11.2 Listing information about processes -- 11.3 Sending signals to processes -- 11.3.1 Killing a process -- 11.4 Changing the priority of a process -- 11.5 Working with jobs -- 11.5.1 Foreground and background processes -- 11.5.2 Daemons -- 11.5.3 Zombie process -- 11.5.4 Starting and stopping a process -- 11.5.5 Scheduling a process for later operation (the at command) -- 11.5.6 Listing all the scheduled processes (at or atq commands) -- 11.5.7 Removing a process from the schedule (the at command) -- 11.6 Binding or unbinding a process -- 11.7 Quick reference -- Chapter 12. Printer management -- 12.1 Printing overview -- 12.2 AIX print subsystem vs. System V print subsystem -- 12.2.1 Switching between the two AIX 5L print subsystems -- 12.3 Print queue administration -- 12.3.1 Adding a local print queue -- 12.3.2 Displaying a queue configuration information -- 12.3.3 Deleting a queue. -- 12.3.4 Enabling and disabling a queue -- 12.3.5 Cancelling print jobs -- 12.4 Remote printing -- 12.4.1 Setting the system up as a print server -- 12.4.2 Adding a remote host-attached printer -- 12.5 Printing job management -- 12.5.1 Submitting printing jobs -- 12.5.2 Checking status -- 12.5.3 Print queue status -- 12.5.4 Cancelling a printing job -- 12.5.5 Prioritizing a printing job -- 12.5.6 Holding and releasing a printing job -- 12.5.7 Moving a job between queues -- 12.6 Printer pooling -- 12.7 Quick reference -- Chapter 13. Security -- 13.1 Overview -- 13.2 Hardware security -- 13.2.1 Sun SPARC hardware security features -- 13.2.2 IBM ^ pSeries (RS/6000) hardware security features -- 13.3 Securing Solaris and AIX platforms -- 13.3.1

Securing a Solaris platform -- 13.3.2 Securing the AIX platform -- 13.4
 Trusted Computing Base (TCB) -- 13.4.1 Checking the Trusted
 Computing Base -- 13.4.2 Using the tcbck command -- 13.4.3
 Configuring the tcbck program -- 13.4.4 Understanding the report --
 Chapter 14. Performance management -- 14.1 Overview -- 14.2 CPU
 concepts and performance analysis -- 14.2.1 The lifetime of a process
 -- 14.2.2 The process queues -- 14.2.3 CPU timeslice and process
 priority -- 14.2.4 CPU monitoring using sar -- 14.3 Memory concepts
 and performance analysis -- 14.3.1 The AIX Virtual Memory Manager
 -- 14.3.2 The page stealer -- 14.3.3 Memory monitoring: vmstat --
 14.3.4 Advanced memory tools: svmon -- 14.3.5 Paging space -- 14.4
 I/O concepts and performance analysis -- 14.5 Disk and LVM
 monitoring: iostat -- 14.5.1 Conclusions for iostat -- 14.6 Advanced
 tools: filemon -- 14.7 Network concepts and performance analysis --
 14.7.1 Network monitoring: netstat -- 14.7.2 Network tuning
 techniques and commands -- 14.8 Introduction to workload
 management -- 14.9 Quick reference -- Chapter 15. Troubleshooting
 -- 15.1 Overview.
 15.2 Error logging.

3. Record Nr.	UNINA9911144157303321
Autore	Kalkman W. M. A (Wouter M. A.), <1961->
Titolo	'Papier, hier! ...'? // Wouter Kalkman
Pubbl/distr/stampa	Amsterdam, : Vossiuspers UvA, 2006
ISBN	1-281-98593-7 9786611985936 90-485-0988-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (33 p.)
Collana	VOR Rechtsgeleerdheid
Disciplina	303.48 303.48/33
Soggetti	Insurance Internet Legal issues
Lingua di pubblicazione	Olandese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.

Nota di bibliografia	Includes bibliographical references (p. 25-32).
Nota di contenuto	1. Inleiding; 2. De wetgever; 3. De betekenis van internet voor het verzekeringsbedrijf ende consument; 4. De mogelijkheden van de consument; 5. Samenvatting, conclusies en voorstellen tot verandering; 6. Dankwoord; Noten
Sommario/riassunto	Verzekeren via internet staat volop in de belangstelling. Maar maakt de Nederlandse wetgeving het aanvragen en sluiten van een verzekering en het verstrekken van een elektronische polis via internet wel voldoende mogelijk? Consumenten die rechtstreeks met een verzekeraar een verzekering willen sluiten, kunnen meer informatie via e-mail en internet ontvangen dan consumenten die de hulp van een assurantietussenpersoon inroepen. Het afgeven van een elektronische polis is nog niet mogelijk. Bij de wetgever ontbreekt een consistente gedachte over verzekeren via internet en dat belemmert de ontwikke
