

1. Record Nr.	UNINA9911090091303321
Autore	Stafford Jean
Titolo	L'analyse multivariée avec SPSS // Jean Stafford, Paul Bodson avec la collaboration de Marie-Christine Stafford
Pubbl/distr/stampa	Quebec, Quebec : , : Presses de l'Universite du Quebec, , 2007 ©2006
ISBN	9782760518735 2760518736 9781435685543 1435685547
Edizione	[1st ed.]
Descrizione fisica	1 online resource (258 pages)
Altri autori (Persone)	StaffordMarie-Christine BodsonPaul
Disciplina	364/.07/27
Soggetti	Computer programs Factor analysis - Data processing Regression analysis - Data processing
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Comprend des ref. bibliogr.: pages [233]-238.
Nota di contenuto	Table des matieres; Introduction; 1. L'analyse des donnees; 2. Le traitement des donnees par ordinateur; 3. L'analyse factorielle en composantes principales; 4. L'analyse factorielle des correspondances; 5. Analyse bivariee : Tableau de contingence et khi-carre; 6. Analyse bivariee : L'analyse de variance; 7. Analyse bivariee : Correlation et regression simple; 8. La regression multiple; 9. La regression logistique; Epilogue; Bibliographie; Tables statistiques
Sommario/riassunto	Les auteurs proposent une approche pratique et empirique qui allie l'analyse statistique a l'utilisation d'un logiciel facile d'accès : SPSS. En decrivant les diverses methodes de l'analyse multivariee, ils presentent les interrelations entre plusieurs variables d'une base de donnees et en generalisent les conclusions par inference statistique du traitement informatique des donnees jusqu'a l'interpretation des resultats.

2. Record Nr.	UNINA9911087465903321
Titolo	Public health perspectives on disability : epidemiology to ethics and beyond / / Donald J. Lollar, Elena M. Andresen, editors
Pubbl/distr/stampa	New York, NY, : Springer Science+Business Media, LLC, 2010
ISBN	1-282-97189-1 9786612971891 1-4419-7341-9
Edizione	[1st ed. 2011.]
Descrizione fisica	1 online resource (292 p.)
Altri autori (Persone)	LollarDonald J AndresenElena
Disciplina	362.40973 610 613 614.44
Soggetti	Disabilities People with disabilities
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface -- Introduction: History and Import -- Health Services Administration -- Biostatistics and Epidemiology -- Behavioral Science and Health Education -- Environmental Health Sciences and Occupational Health -- Health Law And Ethics -- Maternal And Child Health and Family Health -- International Health -- The School as a Physical Setting -- Student Essay -- Disasters and Disability.
Sommario/riassunto	Public Health Perspectives on Disability Donald J. Lollar, Elena Andresen, editors Traditionally, the public health viewpoint on disability was geared toward primary prevention of disabling conditions or events. More recently, with the movement for disability rights and the emergence of disability studies, the challenge to the field has been to promote positive health outcomes in this underserved community. Such a change in public health culture must start at the educational level, yet training programs have generally been slow in integrating this perspective—with its potential for enriching the field—into their curricula. Public Health Perspectives on Disability meets this challenge

with an educational framework for rethinking disability in public health study and practice, and for attaining the competencies that should accompany this knowledge. This reference balances history and epidemiology, scientific advances, advocacy and policy issues, real-world insights, and progressive recommendations, suiting it especially to disability-focused courses, or to add disability-related content to existing public health programs. Each chapter applies awareness and understanding of disabled persons' experience to one of the core curriculum areas, including:

- Health services administration.
- Environmental health science and occupational health.
- Health law and ethics.
- The school as physical setting.
- Maternal, child, and family health.
- Disasters and disability.

In *Public Health Perspectives on Disability*, faculty, researchers, administrators, and students in graduate schools of public health throughout the U.S. will find a worthy classroom text and a robust source of welcome—and much needed—change.
