

1. Record Nr.	UNINA9911088243303321
Autore	Damiand Guillaume
Titolo	Combinatorial maps : efficient data structures for computer graphics and image processing / / Guillaume Damiand, Pascal Lienhardt
Pubbl/distr/stampa	Boca Raton : , : A.K. Peters/CRC Press, , [2015] ©2015
ISBN	9781040073650 1040073654 9780429170379 0429170378 9781482206531 1482206536
Edizione	[1st edition]
Descrizione fisica	1 online resource (402 p.)
Classificazione	COM012000TEC015000
Disciplina	005.7/3 005.73
Soggetti	Data structures (Computer science) Image processing - Mathematics Computer graphics - Mathematics Combinatorial designs and configurations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front Cover; Contents; Acknowledgements; List of Algorithms; List of Figures; 1. Introduction; 2. Preliminary Notions; 3. Intuitive Presentation; 4. n-Gmaps; 5. n-maps; 6. Operations; 7. Embedding for Geometric Modeling and Image Processing; 8. Cellular Structures as Structured Simplicial Structures; 9. Comparison with Other Cellular Data Structures; 10. Concluding Remarks; Bibliography
Sommario/riassunto	Although they are less widely known than other models, combinatorial maps are very powerful data structures and can be useful in many applications, including computer graphics and image processing. The book introduces these data structures, describes algorithms and data structures associated with them, makes connections to other common structures, and demonstrates how to use these structures in geometric

modeling and image processing. The data structures and algorithms introduced in the book will be available in a C++ library on the authors' website--
