Sommario/riassunto	Study design and statistical methodology are two important concerns for the clinical researcher. This book sets out to address both issues in a clear and concise manner. The presentation of statistical theory starts from basic concepts, such as the properties of means and variances, the properties of the Normal distribution and the Central Limit Theorem and leads to more advanced topics such as maximum likelihood estimation, inverse variance and stepwise regression as well as, time-to-event, and event-count methods. Furthermore, this book explores sampling methods, study design and statisti

Sommario/riassunto

Millennial Ecuador is a superb collection of essays by leading anthropologists, historians, and indigenous intellectuals that provides a multifaceted, critical view of the social and cultural practices of Andean, Amazonian, and Afro-Ecuadorian peoples engaged in mounting political struggles. Focusing on the clash between structural and contra-structural power, on empowerment processes of traditionally disenfranchised populations, and on multiple and competing representations of current confrontations, the book constitutes an outstanding analysis of the contradictions of modern and millennial gl
