Edizione	[1st ed.]
Descrizione fisica	1 online resource (297 p.)
Disciplina	306.874 3
Soggetti	Motherhood Mother and child Security (Psychology) in children Security (Psychology)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Front matter -- Contents -- Acknowledgments -- 1. Introduction -- 2. Shielding and Antidote Strategies -- 3. Compensatory Connection Strategy -- 4. Light- Motherload Connection -- 5. Inoculation Strategy -- 6. Friendship Strategy -- 7. Light- Motherload Independence -- 8. Conclusion -- Appendix A. Research Participants -- Appendix B. Research Methods -- Notes -- References -- Index
Sommario/riassunto	In a time of economic anxiety, fear of terrorism, and marital uncertainty, insecurity has become a big part of life for many American mothers. With bases of security far from guaranteed, mothers are often seeking something they can count on. In this beautifully written and accessible book, Ana Villalobos shows how mothers frequently rely on the one thing that seems sure to them: the mother-child relationship. Based on over one hundred interviews with and observations of mothers-single or married, but all experiencing varying forms of insecurity in their lives-Villalobos finds that mothers overwhelmingly expect the mothering relationship to "make it all better" for themselves and their children. But there is a price to pay for loading this single relationship with such high expectations. Using detailed case studies, Villalobos shows how women's Herculean attempts to create various

kinds of security through mothering often backfire, thereby exhausting mothers, deflecting their focus from other possible sources of security, and creating more stress. That stress is further exacerbated by dominant ideals about "good" mothering-ideals that are fraught with societal pressures and expectations that reach well beyond what mothers can actually do for their children. Pointing to hopeful alternatives, Villalobos shows how more realistic expectations about motherhood lead remarkably to greater security in families by prompting mothers to cast broader security nets, making conditions less stressful and-just as significantly-bringing greater joy in mothering.

Nota di contenuto	The ancient household and its food -- Settlement classification in Iron Age Judah -- A spatial analysis of Iron II Judahite settlements --

Broader perspectives : art, literature, and ethnography -- Home cooking in the Hebrew Bible -- Mixing the ingredients together.

Sommario/riassunto

The study of food in the Hebrew Bible and Syro-Palestinian archaeology has tended to focus on kosher dietary laws, the sacrificial system, and feasting in elite contexts. More everyday ritual and practice - the preparation of food in the home - has been overlooked. Food in Ancient Judah explores both the archaeological remains and ancient Near Eastern sources to see what they reveal about the domestic gastronomical daily life of ancient Judahites within the narratives of the Hebrew Bible. Beyond the findings, the methodology of the study is in itself innovative. Biblical passages that deal with domestic food preparation are translated and analysed. Archaeological findings and relevant secondary resources are then applied to inform these passages. Food in Ancient Judah reflects both the shift towards the study of everyday life in biblical studies and archaeology and the huge expansion of interest in food history - it will be of interest to scholars in all these fields.
