| Sommario/riassunto      | In 2006 over 60% of medical graduates in the UK were female, and the number of women going to medical school as 'mature students' is                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

steadily increasing. Some of these women will, at some point, choose to have a baby, but the question always asked is how to fit it in with a medical career? Along with the problem of finding time to actually have a baby, and coping as a pregnant doctor, there is the problem of finding information when it is most needed. This book addresses this problem, bringing a wealth of information together in one easy-to-use resource. Written by a mother, who has faced the j
