Sommario/riassunto	Written by an internationally renowned authority in geriatric psychiatry, this text discusses the most common emotional problems affecting the elderly: memory loss, depression, anxiety, sleeping problems, alcohol and drug abuse, and others. Each problem is addressed in a consistent format highlighting: the nature and scope of the problem.; the etiological factors involved.; a diagnostic workup.; treatment strategies. The focus is on providing the health practitioner with information and specific strategies to diagnose the nature of the problem and to resolve the difficulties, as the situation

Sommario/riassunto	From gray whales giving birth in the lagoons of Baja California to sea otters nestled in kelp beds off California to killer whales living around Vancouver Island-this spectacular stretch of the Pacific Coast boasts one of the most abundant populations of sea mammals on earth. This handy interpretive field guide describes the 45 whales, dolphins, seals, and otters that are resident in, migrate through, or forage from Baja in

Mexico to British Columbia in Canada. The guide's rich species accounts provide details on identification, natural history, distribution, and conservation. They also tell where and how these fascinating animals can best be viewed. Introductory chapters give general information on the ecology, evolution, and taxonomy of marine mammals; on the Pacific Coast's unique environment; and on the relationship between marine mammals and humans from native cultures to today. Featuring many color illustrations, photographs, drawings, and maps, this up-to-date guide illuminates a fascinating group of animals and reveals much about their mysterious lives in the ocean.
