Sommario/riassunto	In 1852 Hannah Rebecca Crowell married sea captain William Burgess and set sail. Within three years, Rebecca Burgess had crossed the equator eleven times and learned to navigate a vessel. In 1856, 22-year-old Rebecca saved the ship Challenger as her husband lay dying from dysentery. The widow returned to her family's home in Sandwich,

Massachusetts, where she refused all marriage proposals and died wealthy in 1917. This is the way Burgess recorded her story in her prodigious journals and registers, which she donated to the local historical society upon her death, but there is no other evidence that this dramatic event occurred exactly this way. In *The Captain's Widow of Sandwich*, Megan Taylor Shockley examines how Burgess constructed her own legend and how the town of Sandwich embraced that history as its own. Through careful analysis of myriad primary sources, Shockley also addresses how Burgess dealt with the conflicting gender roles of her life, reconciling her traditionally masculine adventures at sea and her independent lifestyle with the accepted ideals of the period's "Victorian woman."

Sommario/riassunto

In this timely and comprehensive text, Cesare Cornoldi and Tomaso Vecchi describe their recently developed experimental approach to the investigation of visuo-spatial cognition, based upon the analysis of individual differences. A review of the most influential theoretical advances in the study of visuo-spatial cognition is presented, including both critical analysis and comparisons between the distinct approaches. In addition, the authors describe recent research into memory for spatial configurations, mental manipulation and the active integration of visuo-spatial information. This inclu
