Sommario/riassunto

This volume explores the case for and the prospects of the development of world-regional social policies as integral elements of a pluralistic, equitable and effective system of global governance. Focusing on transnational regionalism, this book examines the trajectory and crossing over of the three strands of scholarly analysis within the past decade which have given rise to this volume: the perceived negative impact of neo-liberal globalisation upon national social policy; the need for but the difficulty of securing reforms in the institutions of global social governance; and the i

ALCOHOL FIBRES -- INDEX.

Sommario/riassunto

Cellulose and its derivatives - cellulose acetate - are renewed polymers. There are many data about the nature of free-radical particles, being formed at irradiation of cellulose by ultraviolet light. This title presents main types of macroradicals, with indication of atom and groups of atoms after removal of which these macroradicals are formed.
