Sommario/riassunto	The euphoria of discovery is the only motivation many scientists need for studying nature and its secrets. Yet euphoria is rarely expressed in scientific publications. This book, a personal account of more than thirty years of fieldwork by one of the world's leading bat biologists, wonderfully conveys the thrill of scientific discovery. Theodore Fleming's work to document the lives and ecological importance of plant-visiting bats has taken him to the tropical forests of Panama, Costa Rica, and Australia, and to the lush Sonoran Desert of northwest Mexico and Arizona. This book tells the story of his fascinating career

and recounts his many adventures in the field. Fleming weaves autobiographical reflections together with information on the natural history and ecology of bats and describes many other animals and plants he has encountered. His book details the stresses and rewards of life in scientific field camps, gives portraits of prominent biologists such as Dan Janzen and Peter Raven, and traces the development of modern tropical biology. A witness to the destruction and development of many of the forests he has visited throughout his career, Fleming makes a passionate plea for the conservation of these wild places.

Sommario/riassunto	Namen knjige je odgovoriti na vprašanje, kako etnino-migracijska dinamika v Sloveniji kroji razmere, v katere se vpenja vojska kot specifina delovna organizacija, s poudarkom na vprašanju zaposlovanja v Slovenski vojski. Tako kot izhajamo iz potrebe po kompleksnejši integraciji priseljencev, ki je pogoj za notranjo varnost Slovenije, hkrati pa predstavlja možnost za razširitev nabornega potenciala Slovenske vojske, smo tudi rešitve iskali zlasti na polju uinkovitejših ukrepov za uspešno integracijo priseljencev in doslednejšega uresnievanja že sprejetih usmeritev na tem podroju.

Knjiga je zasnovana izrazito interdisciplinarno. Raziskava, katere rezultat prinaša knjiga, je bila z metodološkega vidika v prevladujoem delu izrazito kvalitativne narave, v vsebinskem smislu pa prav tako izrazito usmerjena k humanistnim vidikom obravnavane problematike.
