Sommario/riassunto	More than two decades of mounting evidence confirms that the existing scale of the human enterprise has surpassed global ecological limits to growth. Based on such limits, The No-Growth Imperative discounts current efforts to maintain growth through eco-efficiency initiatives and smart-growth programs, and argues that growth is inherently unsustainable and that the true nature of the challenge confronting us now is one of replacing the current growth imperative with a no-growth imperative. Gabor Zovanyi asserts that anything less than stopping growth would merely slow today's
