

1. Record Nr.	UNINA9911114417203321
Autore	Yamauchi Hiroyuki
Titolo	Electronics, Communications, and Control Engineering : Selected Proceedings of the 8th International Conference on Electronics, Communications, and Control Engineering (ICECC 2025) // edited by Hiroyuki Yamauchi, Keping Wang, Ickho Song
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2026
ISBN	981-9528-20-8 9789819528202
Edizione	[1st ed. 2026.]
Descrizione fisica	1 online resource (0 pages)
Collana	Lecture Notes in Electrical Engineering, , 1876-1119 ; ; 1490
Altri autori (Persone)	WangKeping SongIckho
Disciplina	621.3
Soggetti	Electrical engineering Automatic control Robotics Automation Telecommunication Electrical and Electronic Engineering Control, Robotics, Automation Communications Engineering, Networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Analysis of Cell Heating Power in a Si Single Crystal PV Module with Hot Spot Cells -- Linearization Techniques for Bipolar Transistor Transconductance Stage -- Design and Synthesis of Capacitance Multiplier Using LT1228s and a Grounded Capacitor -- A Reliability and Performance Study of Neural Networks on Resource-Constrained Platforms -- Binary Splitting Test Generation for a Pattern Matching Accelerator with In-Memory-Processing Architecture -- 650 V Multiple Floating P Oxide-Trenches High Conductivity Insulated Gate Bipolar Transistor Design -- A Low-power and Small-area Squarer for Wearable ECG Devices Utilizing Pan-Tompkins Algorithm -- Reliability Calculation for Paper Robots, Case Study: Assistive Robot with Human

-- Etc...

Sommario/riassunto

This book includes the select proceedings from the 8th International Conference on Electronics, Communications, and Control Engineering, ICECC 2025, held in Japan in March 2025. It includes a diverse range of topics, including emerging technologies, innovative applications, and theoretical advancements, bringing together a collection of groundbreaking research and developments in the fields of electronics, communications, and control engineering. From cutting-edge research to practical implementations, this volume provides valuable insights from leading experts in the field. Offering a unique blend of theoretical knowledge and real-world applications, this book is an essential resource for researchers, academics, and professionals in the fields of electronics, communications, and control engineering.
