Sommario/riassunto	<P>First published in 1942, this dictionary was designed to help civilians and members of H.M. forces to make their way amid the jungle of wartime abbreviations. The preface notes that newspaper readers, sailors, soldiers and airmen had to thrust themselves, like explorers, into these abbreviations in search of truth, or the execution of their martial duty and hence, a dictionary was necessary. This book will be of interest to scholars of history and language, as well as the more general, interested reader.</P>

Sommario/riassunto	The purpose of the monograph Crossroads of Orthography which aims, as did its predecessor Junctions of Orthography (2012), to present arguments for additions and changes to normative rules – is to encourage normative and orthographic activities in Slovenian linguistic society. In the 20th century, these activities were intensified only after publication of normative guides called “pravopis” and during polemical discussions that accompanied the results. With both monographs, we want to encourage public debate before the publication of the new normative guide and also to find answers to the language and normative difficulties, which are not problematic only in terms of linguistics and orthography, but also within the wider social environment. In six thematic sections of the monograph, 26 authors of 22 articles deal with specific normative issues (capitalization and punctuation) as well as with other topics on different levels of grammatical description – phonology, morphology and word formation. The problems of orthography in other, often non-linguistic fields are discussed. In the last two parts of the monograph, the problems of lexicographic approaches to orthography and its relation to language culture are considered. Monografija Pravopisna razpotja tako z imenom kot z obliko
