Sommario/riassunto	Why do some militant nationalists turn to electoral politics while others resist-and even seek to destroy-that arena? Cynthia L. Irvin examines two cases of electoral interventions by nationalist organizations engaged in violent political competition: in Northern Ireland and in the Basque provinces of Spain. Through her research, she offers important insights into these insurgent organizations' adoption of different strategies--from armed struggle to parliamentary politics.

Sommario/riassunto	The volume is intended for classical philologists and a broad range of scholars working in the fields of theoretical, historical, and comparative

linguistics with Ancient Greek, Latin, or Slavic languages as the primary evidence in their research. The contributions address topics ranging from issues of grammatography in a diachronic perspective to historical and comparative linguistics. They encompass both monothematic case studies and comprehensive analyses that capture a linguistic phenomenon in its entirety as well as within a broader context.

Sommario/riassunto	Forensic Botany: A Practical Guide is an accessible introduction to the way in which botanical evidence is identified, collected and analysed in criminal cases. Increasingly this form of evidence is becoming more important in forensic investigation and yet there are few trained

botanists able to assist in such cases. This book is intended to show how useful simple collection methods and standard plant analysis can be in the course of such investigations and is written in a clear and accessible manner to enhance understanding of the subject for the non-specialist.
