| Sommario/riassunto      | <p>In 1924, the Triglav Lakes Valley was designated a protected area, which is today part of the central area of extensive Triglav National Park. The lakes give a special character to the valley, which also stands out for its other natural features. In terms of nonliving nature, this volume presents some of the valley's geological, geomorphological, and hydrological characteristics, and, in terms of living nature, it presents its vegetation, focusing on botanical characteristics and forest. The volume also discusses the human presence and its impact on the appearance of the landscape.</p> <p>Leta 1924 je bilo v Dolini Triglavskih jezer vzpostavljeno zavarovano obmoje. Danes je del osrednjega dela obsežnejšega Triglavskega narodnega parka. Dolini dajejo poseben peat jezera, izstopa pa tudi po drugih naravnih posebnostih. V okviru nežive narave so v knjigi predstavljene nekatere njene geološke, reliefne in vodne znailnosti, v okviru žive narave pa rastje, s poudarkom na botaninih znailnostih in gozdu. Knjiga predstavlja tudi lovekovo prisotnost in njegov vpliv na videz pokrajine.</p> |
