

1. Record Nr.	UNINA9911117550503321
Autore	Graham Gordon
Titolo	The Hope of the Poor : Philosophy, Religion and Economic Development
Pubbl/distr/stampa	Luton, Bedfordshire : , : Imprint Academic, , 2023 ©2023
ISBN	9781788361095 1788361091 9781788361101 1788361105
Edizione	[1st ed.]
Descrizione fisica	1 online resource (230 p.) : ill
Disciplina	362.501
Soggetti	Economic development Poor
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Contents -- Front Matter -- Title Page -- Publisher Information -- Preface -- The Hope of the Poor -- 1: Philosophical Preliminaries -- I. Our Common Humanity -- II. Agency -- III. Practical Reason -- IV. Radical Philosophies -- V. Religion -- Next Steps -- 2: Framing a Philosophy of Ordinary Life -- I. Experiences -- II. Achievements -- III. Relationships -- 3: The Human Condition -- I. Practical Wisdom -- II. Pictures and Myths -- III. Geocentrism and Anthropocentrism -- IV. The Baconian Vision -- V. Neo-Baconianism -- 4: Poverty versus Impoverishment -- The Argument So Far -- I. Identifying 'the Poor' -- II. Assessing the Quality of Life -- III. Living a Good Life -- 5: Giving, Receiving, and Benefitting -- I. Combatting Impoverishment -- II. Priorities -- III. Aid and Dependency -- IV. Poverty, Prosperity, and Frugality -- V. Wealth versus Enrichment -- Summary of the Argument Up to this Point -- 6: Economic Development and the Form of the Personal -- I. The Crisis of the Personal -- II. The Form of the Personal, the Baconian Vision, and Economic Development -- III. Persons, Objects, and Organisms -- IV. Humanity and 'Development' -- VII. Returning to Practical Reason -- 7: Redeeming the Time -- I. Life and Time -- II. Vocation and Dwelling --

III. Development and Contingency -- IV. Action, Purpose, and Style -- V. Death and Meaning -- VI. Practical Wisdom and Religion -- Back Matter -- Bibliography -- Books -- Also Available.

Sommario/riassunto

Is economic development the best hope for the worlds poor? This volume adds a philosophical dimension to the debate about this question. The author argues in favour of replacing quantitative assessments of wealth and poverty with a qualitative account of the ways in which human lives can be enriched or impoverished.

2. **Record Nr.**

UNINA9911146377303321

Titolo

Regularization, optimization, kernels, and support vector machines / / edited by Johan A.K. Suykens, KU Leuven, Belgium, Marco Signoretto, KU Leuven, Belgium, Andreas Argyriou, Ecole Centrale Paris, France

Pubbl/distr/stampa

Boca Raton : , : Taylor & Francis, , [2015]

9780429076121

Edizione

[1st ed.]

Descrizione fisica

1 online resource (522 p.)

Collana

Chapman and Hall/CRC Machine Learning & Pattern Recognition

Classificazione

COM021030COM037000TEC007000

Disciplina

511.8
511/.8

Soggetti

Mathematical models
Mathematical statistics

Lingua di pubblicazione

Inglese

Formato

Materiale a stampa

Livello bibliografico

Monografia

Note generali

A Chapman and Hall book.

Nota di bibliografia

Includes bibliographical references at the end of each chapters.

Nota di contenuto

Front Cover; Contents; Preface; Contributors; Chapter 1: An Equivalence between the Lasso and Support Vector Machines; Chapter 2: Regularized Dictionary Learning; Chapter 3: Hybrid Conditional Gradient-Smoothing Algorithms with Applications to Sparse and Low Rank Regularization; Chapter 4: Nonconvex Proximal Splitting with Computational Errors; Chapter 5: Learning Constrained Task

Similarities in Graph-Regularized Multi-Task Learning; Chapter 6: The Graph-Guided Group Lasso for Genome-Wide Association Studies
Chapter 7: On the Convergence Rate of Stochastic Gradient Descent for Strongly Convex Functions
Chapter 8: Detecting Ineffective Features for Nonparametric Regression; Chapter 9: Quadratic Basis Pursuit; Chapter 10: Robust Compressive Sensing; Chapter 11: Regularized Robust Portfolio Estimation; Chapter 12: The Why and How of Nonnegative Matrix Factorization; Chapter 13: Rank Constrained Optimization Problems in Computer Vision; Chapter 14: Low-Rank Tensor Denoising and Recovery via Convex Optimization; Chapter 15: Learning Sets and Subspaces; Chapter 16: Output Kernel Learning Methods
Chapter 17: Kernel-Based Identification of Systems with Multiple Outputs Using Nuclear Norm Regularization
Chapter 18: Kernel Methods for Image Denoising; Chapter 19: Single-Source Domain Adaptation with Target and Conditional Shift; Chapter 20: Multi-Layer Support Vector Machines; Chapter 21: Online Regression with Kernels

Sommario/riassunto

Obtaining reliable models from given data is becoming increasingly important in a wide range of different applications fields including the prediction of energy consumption, complex networks, environmental modelling, biomedicine, bioinformatics, finance, process modelling, image and signal processing, brain-computer interfaces, and others. In data-driven modelling approaches one has witnessed considerable progress in the understanding of estimating flexible nonlinear models, learning and generalization aspects, optimization methods, and structured modelling. One area of high impact both in theory and applications is kernel methods and support vector machines. Optimization problems, learning, and representations of models are key ingredients in these methods. On the other hand, considerable progress has also been made on regularization of parametric models, including methods for compressed sensing and sparsity, where convex optimization plays an important role. At the international workshop ROKS 2013 Leuven, 1 July 8-10, 2013, researchers from diverse fields were meeting on the theory and applications of regularization, optimization, kernels, and support vector machines. At this occasion the present book has been edited as a follow-up to this event, with a variety of invited contributions from presenters and scientific committee members. It is a collection of recent progress and advanced contributions on these topics, addressing methods including.--
