Disciplina	780.74
Soggetti	Popular music Archives, Technical
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This work examines the cultural heritage and archival practices within UK DIY music communities, exploring their documentation, memory preservation, and the impact of political, technological, and socioeconomic factors. It delves into the dynamics of DIY music spaces, their resistance to traditional music industry structures, and their reliance on solidarity and mutual aid. The book also addresses challenges such as the ephemeral nature of DIY cultural artifacts, the loss of digital records, and the absence of representation in institutional archives. Drawing from the author's personal experiences and PhD research, it highlights the importance of grassroots efforts in preserving cultural legacies through zines, podcasts, blogs, and other community-driven initiatives.
