Dancing Punta on NAFTA Time -- NAFTA's Funeral -- Epilogue. Why Queer Traffic(k) Now? -- Acknowledgments -- Notes -- References -- Index.
Sommario/riassunto	In Queer Traffic , Jennifer Tyburczy traces how sexual dissidents across the Mexico-Canada-US borderlands transport the objects and experiences that nourish their sexual and social lives. She situates the North American Free Trade Agreement (NAFTA) as a pivot point in the formation of panics aimed at stamping out these outlaw sex practices. Highlighting NAFTA's erotic investments in hetero- and homonormativity, racial capitalism, markets of dispossession, and neocolonialism, Tyburczy directly engages with art, activism, and archives to revisit the struggles of people who invented circuits of sexual exchange through four decades of violence and criminalization. In conversing with actors from bureaucrats to pornographers and in

studying choreographies, social movements, and street vocabularies, she examines an array of tactics that undermine the market logics of trade law and policy. Dreaming of other forms of living that go beyond mere survival, *Queer Traffic* guides us through the renegade pathways that circumvent the seemingly endless reach of free-trade capitalism toward other routes to pleasure.

Kinship Relations as a Support System for Children -- 8. Motives for Sharing Food and Other Prosocial Behavior -- References -- Index

Life Histories of the Dobe !Kung re-examines an important anthropological data set for the Dobe !Kung, the well-known "Bushmen" of the Kalahari Desert, collected by Nancy Howell and colleagues. Using life history analysis, Howell reinterprets this rich material to address the question of how these hunter-gatherers maintain their notably good health from childhood through old age in the Kalahari's harsh environment. She divides the population into life history stages that correlate with estimated chronological ages and demonstrates how and why they survive, even thrive, on a modest allotment of calories. She describes how surplus food is produced and distributed, and she considers both the motives for the generous sharing she has observed among the Dobe !Kung and some evolutionary implications of that behavior.
