

1. Record Nr.	UNINA9911139789403321
Autore	Lam Yeh
Titolo	The geometric process and its applications // Yeh Lam
Pubbl/distr/stampa	Singapore ; ; Hackensack, NJ, : World Scientific, c2007
ISBN	9786611928377 9781281928375 1281928372 9789812775795 981277579X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (316 p.)
Disciplina	516
Soggetti	Stochastic processes Renewal theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 291-296) and index.
Nota di contenuto	1. Preliminaries -- 2. Geometric process -- 3. Geometric function -- 4. Statistical inference of geometric process -- 5. Application of geometric process to data analysis -- Geometric process maintenance model -- 7. Application to analysis of system reliability -- 8. Applications of geometric process to operational research.
Sommario/riassunto	A geometric process is a simple monotone process that was first introduced by the author in 1988. It is a generalization of renewal process. This book captures the extensive research work on geometric processes that has been done since then in both probability and statistics theory and various applications. Some results are published for the first time. A reference book for researchers and a handbook for practitioners, it is also a useful textbook for postgraduate or senior undergraduate students.
