Sommario/riassunto	Volume One of Three Revolutions presents the overall research and discussions on topics related to the revolutionary events that have unfolded in Ukraine since 1990. The three revolutions referred to in this project include: the Revolution on Granite (1990); the Orange Revolution (2004–2005); and the Euromaidan Revolution (2013–2014). The project's overall goal was to determine the extent to which we have

the right to use the term "revolution" in relation to these events. Moreover, the research also uncovered the methodological problems associated with this task. Lastly, the project investigated to what extent the three revolutions are connected to each other and to what extent they are detached. Hence, the research in this volume not only discusses the theoretical aspects but also provides new analyses on such issues as religion, memory, and identity in Ukraine.
