Sommario/riassunto	Participation of concerned actors and the public is a central element in

the legal regulation of science and technology. In constitutional democracy, these participatory forms are governed by the rule of law. The volume critically examines participatory governance in this realm and makes suggestions with respect to further institutional and political-cultural developments. It assembles contributions of a broad interdisciplinary range within a comparative research programme, opening the black box of participatory governance in legal procedure. The contributions are the result of almost a decade of fruitful discussion between the authors. They also demonstrate the potential of a cross-disciplinary approach that stretches from sociology, via political science and jurisprudence to hermeneutics, linguistics and conversation analysis. Contributors are Gabriele Abels, Matthias Baier, Alfons Bora, Elena Collavin, Heiko Hausendorf, Zsuzsanna Iványi, András Kertész, Les Levidow, Kornélia Marinecz, Peter Munte, Patrick O' Mahony, Giuseppe Pellegrini, and Henrik Rahm.

Sommario/riassunto	This book examines the risk factors surrounding children at risk of experiencing and perpetrating violence, and looks at the positive role that children's rights can play in their protection. The authors propose that violence in childhood is not spontaneous: that children are raised to become violent in poorly functioning families.
