Sommario/riassunto	Dreams that Matter explores the social and material life of dreams in contemporary Cairo. Amira Mittermaier guides the reader through landscapes of the imagination that feature Muslim dream interpreters who draw on Freud, reformists who dismiss all forms of divination as superstition, a Sufi devotional group that keeps a diary of dreams related to its shaykh, and ordinary believers who speak of moving

encounters with the Prophet Muhammad. In close dialogue with her Egyptian interlocutors, Islamic textual traditions, and Western theorists, Mittermaier teases out the dream's ethical, political, and religious implications. Her book is a provocative examination of how present-day Muslims encounter and engage the Divine that offers a different perspective on the Islamic Revival. Dreams That Matter opens up new spaces for an anthropology of the imagination, inviting us to rethink both the imagined and the real.

Sommario/riassunto	Control of Machines is one of the most important functional areas for electrical and mechanical engineers working in industry. In this era of

automation and control, every engineer has to acquaint himself on the design installation, and maintenance of control systems. This subject must find its place as a compulsory applied engineering subject in degree and diploma curriculum. Some progressive states and autonomous institutions have already introduced this subject in their curriculum. In this book, static control and programmable controllers have been included keeping in view the latest
