And How We Can Fix It -- Appendix: Greening Schools for Alternative Education -- Notes -- Selected Bibliography -- Acknowledgments -- Index
Sommario/riassunto	At a time when wild places everywhere are vanishing before our eyes, Charles Saylan and Daniel T. Blumstein offer this passionate indictment of environmental education-along with a new vision for the future. Writing for general readers and educators alike, Saylan and Blumstein boldly argue that education today has failed to reach its potential in fighting climate change, biodiversity loss, and environmental degradation. In this forward-looking book, they assess the current political climate, including the No Child Left Behind Act, a disaster for environmental education, and discuss how education can stimulate

action-including decreasing consumption and demand, developing sustainable food and energy sources, and addressing poverty. Their multidisciplinary perspective encompasses such approaches as school gardens, using school buildings as teaching tools, and the greening of schoolyards. Arguing for a paradigm shift in the way we view education as a whole, *The Failure of Environmental Education* demonstrates how our education system can create new levels of awareness and work toward a sustainable future.
