

1. Record Nr.	UNISA996206508303316
Titolo	Postpy mikrobiologii = : Advancements of microbiology
Pubbl/distr/stampa	Warszawa : , : Pastwowe Wydawn. Naukowe Warszawa : , : Polskie Towarzystwo Mikrobiologów [Warsaw, Poland] : , : Sciendo, de Gruyter Poland
Descrizione fisica	Online resource (volumes) : illustrations
Disciplina	576/.05
Soggetti	Microbiology Periodicals. Periodical
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed Beginning in 2023, English parallel title is more prominent on piece.

2. Record Nr.	UNINA9911145852003321
Autore	Webster Grady L (Grady Linder), <1927-2005.>
Titolo	Plant diversity of an Andean cloud forest : checklist of the vascular flora of Maquipucuna, Ecuador / / Grady L. Webster and Robert M. Rhode
Pubbl/distr/stampa	Berkeley : , : University of California Press, , 2001
ISBN	9786612356209 9781282356207 1282356208 9780520915930 0520915933
Edizione	[First edition.]
Descrizione fisica	1 online resource (253 pages)
Collana	University of California publications. Botany ; ; v. 82.
Classificazione	WI 9240

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Frontmatter -- Contents -- Illustrations -- Tables -- Acknowledgments -- Abstract -- Resumen -- Introduction -- Climate and topography -- Vegetation -- Floristics of ecuadorian cloud forests -- Analysis of the vascular flora of maquipucuna -- Relationships with other floras -- Conservational status of the maquipucuna cloud forests -- Circumscription of the region covered by the inventory -- Enumeration of taxa -- Appendix A. Dominant or conspicuous taxa of secondary and roadside vegetation in the Maquipucuna region, between 11 50 and 1500 m -- Appendix B. Dominant or abundant taxa of primary cloud forest (lower montane forest), 1700-2000 m -- Appendix C. Dominant or abundant taxa of upper montane forest, 21 00-2750 m -- Appendix D. Dominant and conspicuous taxa in riparian vegetation, 1 125-2000 m -- Appendix E. Distribution of epiphytes in the Maquipucuna vascular flora -- Literature Cited -- Plates
Sommario/riassunto	Based on work spanning a decade, this study of the Maquipucuna area on the western slopes of the Andes discusses the climate, vegetation, ecological relationships, and flora, and emphasizes the importance of the Maquipucuna area as a biological reserve. In addition to the

checklist of the flora, which enumerates 1,650 species (including 228 species of pteridophytes and over 200 species of orchids), appendices give information on floristic composition of communities, distribution of epiphytes, and elevational ranges of families and genera. The illustrations include a map, landscapes, and characteristic species.

3. Record Nr.	UNINA9911078076303321
Titolo	Ruth Obre Dubonnet. February 26, 1951. -- Committed to the Committee of the Whole House and ordered to be printed
