Autore	Lindner Nicolas
Titolo	Acting together : An integrated account of joint action / Nicolas Lindner
Pubbl/distr/stampa	Paderborn, : Brill | mentis, 2020
ISBN	3-95743-744-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (181 pages) : illustrations
Disciplina	128.4
Soggetti	Soziale Kognition kollektive Intentionalität soziokognitive Fähigkeiten gemeinsames Handeln Kooperation Michael Bratman Michael Tomasello social cognition shared agency collective intentionality sociocognitive capacities cooperation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (pages [155]-169).
Sommario/riassunto	Without joint action, man’s cultural, scientific and everyday achievements would be unthinkable. What special cognitive abilities make it possible for this to happen so often and in so many ways? Dancing, waging war, building a castle together in the sandbox - joint action is a central component of everyday life and the success of mankind. This ability is based on special socio-cognitive abilities, the scope and interplay of which characterize the human species. Literature often focuses on the large and complex forms of joint action.This book represents an attempt to present a philosophical reconstruction of joint action through an interdisciplinary investigation of small forms with few actors. This is suitable for explaining the behavior of children and

adults, as well as for taking into account empirical results from related disciplines, especially developmental psychology.

Nota di contenuto	Intro -- Contents -- I. Introduction -- A. Background -- B. A Brief Outline of Indonesian Economic Developments Over The Sample Period -- II. Benchmark Model -- A. Background -- B. The Specification of The Model -- B.1 Observable variables and data definitions -- B.2 Stochastic processes and model definitions -- B.3 Behavorial equations -- B.4 Cross correlations of disturbances -- III. Extending the Model to Include Financial-Real Linkages -- A. Background -- B. Model Specication Incorporating the US Bank Lending TighteningVariable -- V. Confronting the Model with the Data -- A. Bayesian Estimation -- B. Results -- B.1 Estimates of coeficients -- B.2 Estimates of standard deviation of structural shocks and cross correlations -- B.3 RMSEs -- B. 4 Impulse response functions -- VI. Concluding Remarks -- IV. Modifications of the Model for the Indonesian Economy -- References -- Appendix: GPM Data Definitions -- Figures -- 1. Indonesia - Historical Data [1] -- 2. Indonesia - Historical Data [2] -- 3. Indonesia - Historical Data [3] -- 4. Comparison CDS Emerging Countries -- 5. Indonesia Historical Inflation Graph -- 6. Domestic Demand Shock -- 7. Domestic Price Shock -- 8. Domestic Interest Rate Shock -- 9. Domestic Real Exchange Rate Shock -- 10. Shock to the Domestic Target Rate of Inflation -- 11. Demand Shock in the US -- 12. BLT Shock in the US -- Tables -- 1. Results from Posterior Maximization -- 2. Results from Posterior Parameters (standard deviation of structural shocks) -- 3. Results from Posterior Parameters (correlation of structural shocks) -- 4. Root Mean Squared Errors.

Sommario/riassunto

This is the fifth of a series of papers that are being written as part of a larger project to estimate a small quarterly Global Projection Model (GPM). The GPM project is designed to improve the toolkit to which economists have access for studying both own-country and cross-country linkages. In this paper, we add Indonesia to a previously estimated small quarterly projection model of the US, euro area, and Japanese economies. The model is estimated with Bayesian techniques, which provide a very efficient way of imposing restrictions to produce both plausible dynamics and sensible forecasting properties.
