Soggetti	Dutch language - Syntax Grammar, Comparative and general - Syntax
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front matter -- Introduction -- 1. Gaps and Parasitic Gaps -- 2. Het as a referential expression -- 3. The adverbial pronoun er -- 4. Some related topics -- References
Sommario/riassunto	In this study the syntactic properties of empty categories and dummy pronouns are investigated within the framework of Government-Binding theory. The assumption that clauses must have a subject is present in most, if not all, linguistic theories. In GB theory the requirement that clauses have a subject is stipulated as a consequence of the base rules or the Extended Projection Principle. In this book it is claimed that no such stipulation is necessary. The presence of a subject is exclusively determined by the theories of thematic roles and Case.

Sommario/riassunto

Globalization and structural adjustment offer many opportunities for export orientated industrialization in developing economies. As a group, competitiveness in the developing countries has improved, but, while East Asian economies have had rapid export growth and technological upgrades, South Asian and African economies have lagged behind. Old structures, institutions, behavioural patterns and public policies are ill-adapted to deal with the challenges posed by technological change and economic liberalization. Consequently there is an urgent need for change in government and private sector at
