Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front matter -- Contents -- Preface -- Abbreviations -- Introduction -- Book One of Cleomedes'. The Heavens -- APPENDIX: POSIDONIUS ON PHYSICS AND ASTRONOMIE -- GLOSSARY OF SELECTED TERMS -- BIBLIOGRAPHY -- PASSAGES FROM COLLECTIONS IN COLLECTIONS OF TEXTS -- GENERAL INDEX -- INDEX LOCORUM
Sommario/riassunto	At some time around 200 A.D., the Stoic philosopher and teacher Cleomedes delivered a set of lectures on elementary astronomy as part of a complete introduction to Stoicism for his students. The result was The Heavens (Caelestia), the only work by a professional Stoic teacher to survive intact from the first two centuries A.D., and a rare example of the interaction between science and philosophy in late antiquity. This volume contains a clear and idiomatic English translation-the first ever-of The Heavens, along with an informative introduction, detailed

notes, and technical diagrams. This important work will now be accessible to specialists in both ancient philosophy and science and to readers interested in the history of astronomy and cosmology but with no knowledge of ancient Greek.
