Nota di contenuto	Setting the theoretical scene -- The societal and institutional struggle -- Features of Aboriginal English communicative style -- Lexical strategies -- Linguistic mechanisms for identity construction -- Absolutely no regard whatsoever for law and order : David -- More court appearances than some solicitors : Albert -- Not a person to be overborne: Barry -- No fear of the police : closing the Pinkenba case -- Developments since the Pinkenba case -- The power of courtroom talk.
Sommario/riassunto	The book uses critical sociolinguistic analysis to examine the social consequences of courtroom talk. The focus of the study is the cross-examination of three Australian Aboriginal boys who were prosecution witnesses in the case of six police officers charged with their abduction. The analysis reveals how the language mechanisms allowed by courtroom rules of evidence serve to legitimize neocolonial control over Indigenous people. In the propositions and assertions made in cross-examination, and their adoption by judicial decision-makers, the three boys were constructed not as victims of police abuse, but rather in terms of difference, deviance and delinquency. This identity work addresses fundamental issues concerning what it means to be an Aboriginal young person, as well as constraints about how to perform or live this identity, and the rights to which Aboriginal people can lay claim, while legitimizing police control over their freedom of movement. Understanding this courtroom talk requires analysis of the sociopolitical and historical actions and structures within which the courtroom hearing was embedded. Through this analysis, the interrelatedness of structure, agency, constraint and change, which is central to critical sociolinguistics, becomes apparent. In its investigation of language ideologies that underpin courtroom talk, as well as the details of how language is used, and the social consequences of this talk, the book highlights the need for far-reaching changes to courtroom rules of evidence.

Sommario/riassunto	We examine the evolution of the net external asset positions of Central and Eastern Europe (CEEC) countries over the past decade, with a strong emphasis on the composition of their international balance sheets. We assess the extent of their international financial integration, compared with the advanced economies and other emerging markets, and highlight the salient features of their external capital structure in terms of the relative importance of FDI, portfolio equity, and external debt. In addition, we briefly describe the country and currency composition of their external liabilities. Finally, we explore the implications of the accumulated stock of external liabilities for future trade and current account balances.
