| Sommario/riassunto      | This book provides a broad sociolinguistic perspective on major<br>questions of political and cultural Europeanization. It is concerned with<br>European multilingualism as it actually results from the intersecting<br>endeavour of policy making and scientific research. This volume argues<br>that the EU must overcome the major discrepancies of its linguistic<br>diversity politics by developing into a multiple inclusive society beyond<br>the nation-state in order to seriously unfold European multilingualism |

as a political goal. Expanding on the theoretical and methodological approaches developed within the EU project LINEE (Languages in a Network of European Excellence), this book further focuses on the LINEE key variables of European multilingualism i.e. 'culture', 'discourse', 'identity', 'ideology', 'knowledge', 'LPP', 'multi-competence', and 'power & conflict'. Against this background, this study argues for reconceptualising European multilingualism on the basis of an integrative and multi-focal approach.
