	Edizione	[1st ed.]
	Descrizione fisica	1 online resource (373 pages)
	Disciplina	610.696 362.1089
	Soggetti	Physician and patient Health facilities - Translating services
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	1. Interpreter-mediated medical encounters as a field of research -- 2. Emerging trends and corresponding challenges in bilingual health

research -- 3. Innovative research designs to advance theory and practice -- 4. Conceptualizing interpreters in bilingual health communication -- 5. Model of bilingual health communication -- 6. Interpreters' perception and management of competing goals -- 7. Clinical demands and interpersonal relationships in bilingual health care -- 8. Interpreter-mediated encounters as goal-oriented communicative activity -- 9. Moving forward : theory development and practice recommendations.

Sommario/riassunto

This book examines interpreter-mediated medical encounters and focuses primarily on the phenomenon of bilingual health care. It highlights the interactive and coordinated nature of interpreter-mediated interactions. Elaine Hsieh has put together over 15 hours of interpreter-mediated medical encounters, interview data with 26 interpreters from 17 different cultures/languages, 39 health care providers from 5 clinical specialties, and surveys of 293 providers from 5 clinical specialties. The depth and richness of the data allows for the presentation of a theoretical framework that is not restricted by language combination or clinical contexts. This will be the first book of its kind that includes not only interpreters' perspectives but also the needs and perspectives of providers from various clinical specialties. Bilingual Health Communication presents an opportunity to lay out a new theoretical framework related to bilingual health care and connects the latest findings from multiple disciplines. This volume presents future research directions that promise development for both theory and practice in the field.
