| 2. Record Nr. | UNINA9910380754803321 |
| Titolo | Tumor Microenvironment : Signaling Pathways – Part A / / edited by Alexander Birbrair |
| Pubbl/distr/stampa | Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020 |
| ISBN | 3-030-35582-9 |
| Edizione | [1st ed. 2020.] |
| Descrizione fisica | 1 online resource (XI, 170 p. 38 illus., 35 illus. in color.) |
| Collana | Advances in Experimental Medicine and Biology, , 2214-8019 ; ; 1223 |
| Disciplina | 616.994042 |
| Soggetti | Cytology
Cancer
Oncology
Cell Biology
Cancer Biology |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Includes index. |
| Nota di contenuto | Shaping of the tumor microenvironment by Notch signaling --
Erythropoietin signaling in the microenvironment of tumors and healthy |

tissues -- Neuropilin – handyman and power broker in the tumor microenvironment -- Translational landscape of mTOR signaling in integrating cues between cancer and tumor microenvironment -- Toll-like receptors signaling in the tumor microenvironment -- Rho-ROCK signaling in normal physiology and as a key player in shaping the tumor microenvironment -- S1P signaling in the tumor microenvironment -- CD200-CD200R pathway in the regulation of tumor immune microenvironment and immunotherapy -- Index.

Sommario/riassunto

Revealing essential roles of the tumor microenvironment in cancer progression, this book provides a comprehensive overview of the latest research on how different signaling pathways are important in the tumor microenvironment. Multiple signaling pathways are covered, including S1P, neuregulin, Notch, erythropoietin, Rho-ROCK, mTOR, and more. Taken alongside its companion volumes, these books update us on what we know about various aspects of the tumor microenvironment as well as future directions. Tumor Microenvironment: Signaling Pathways – Part A is essential reading for advanced cell biology and cancer biology students as well as researchers seeking an update on research in the tumor microenvironment.
