Sommario/riassunto

The Springer International Handbook of Educational Development in Asia Pacific is organised to provide research-based information on education development in Asia Pacific. The Handbook contains 13 sections and over 150 chapters, covering a wide spectrum of areas including equity and quality in education, language education, learning and human development, lifelong learning, workplace learning and job-skill changes, teacher education and professionalization, higher education development, globalisation, citizenship and moral education, and performance of Asia-Pacific students in international achievement tests. With its international scholarship, the Handbook offers academic discourse and analyses that can be examined worldwide but understood from Asian perspectives, and examined in Asian contexts.
